

## Research Engineer position in Montpellier

### Gene expression dynamics during *Drosophila* development

#### Hosting Institution

---

**IGMM** is located on the historic CNRS Montpellier "Route de Mende" campus. It is physically connected to **CRBM** and **IRIM** research institutes, forming a critical mass of 600 people who create an exceptional dynamic intellectual and technological environment. The labs at IGMM have access to high-tech facilities, in particular through **BioCampus**.

#### Job description

---

Our team investigates how gene expression is regulated during early *Drosophila* development. We use quantitative imaging, including in living embryos to monitor transcription and translation. We are hiring a research engineer with interest in gene regulation and developmental biology. The candidate will work independently on a project for 50% of the time and will work in collaboration with senior members of the lab for the remaining 50% of his/her time. The candidate will primarily perform imaging experiments (live/fixed) and image analysis. More info [here](#).

#### Qualifications

---

Prior experience in one of these fields is essential: imaging or *drosophila* genetics or molecular biology.

Ability to work as part of an international team is required. Capacity to communicate in English and to read and understand English scientific articles is required.

Prior experience in an academic research environment is required (6 months min).

#### Contract information

---

Type of contract: Fixed-term contract

Starting date: 01/10/25

Duration: 6 months initially, renewable up to 2 years.

Working time: full time

Remuneration: according to the current grids

Benefits: collective CNRS catering, reimbursement of part of transportation fees, complementary health insurance, 42 days of paid leave.

Min Degree: Master.

#### Application details

---

Please apply to the CNRS portal [here](#).

Applicants should submit the following information to [mounia.lagha@igmm.cnrs.fr](mailto:mounia.lagha@igmm.cnrs.fr) by email containing "[ERC Research Engineer]" in the subject line:

- 1- CV with contact information of at least 2 referees.
- 2- Cover letter describing your interest in the position
